

*A Nihilistic view of the Universe where life has no real meaning and humans are not that important. Life in the Universe comes and goes and will continue to go on without us.*

*Twenty years ago Stephen Watson became electronic harassed after posting to UFOs forums and conducting his own open source UFO research and then around 2013 he became targeted with Active Denial, directed energy that inflicts pain, the perps also came after his Mother who is a targeted family member. He believes the source of the abuse is "counterterrorism" spending involving the Federal government and intelligence contractors motivated by profit looking for threats. This book may be of an interest to those hearing about the "weaponized DoJ" or "politicized FBI" or militarized police and don't know what to make of the Havana Syndrome now being termed "anomalous health incidents." Is the FBI's Joint Terrorism Task Force involved in stalking and harassing citizens using directed energy that can pass through walls? Why doesn't the FBI elaborate on the nature of what it calls a "disruption?" You'll also learn about the motivation to use the "silent weapon" that are considered Intermediate Force Capabilities. i.e. non-lethal weapons and a grey-zone by a government that believes in alarmism, watch-listing, and increased "domestic terrorism" rhetoric.*

*This book commemorates the 20 year anniversary of my electronic harassment. It started 20 years ago during the Bush-Cheney era when posting to the internet about UFOs. Stephen Watson believes the Pentagon who had its own UAP research program is responsible for his targeting and it is carried out by the Department of Justice and the FBI or Joint Terrorism Task Force through Fusion Centers where citizens are watch-listed lacking due process and public oversight. Stephen Watson believes his targeting constitutes as a 'disruption' by the FBI knowing that his civil liberties are being violated and the justification for violating his constitutional right, the first amendment and eight amendment will not hold up in court. Threat mitigation intelligence contractors that hide under the radar play a role in the targeting so they can deny any direct involvement. Active Denial or the pain ray was developed by Raytheon and the National Institute of Justice - the R&D arm of the DoJ. It was too controversial to use publicly so Stephen Watson believes it is being used covertly by law enforcement and affiliated contractors who have liability protection and operate under a veil of secrecy. Stephen Watson believes the source of his abuse is the counterterrorism bureaucracy where there needs to be more public oversight and reforms. He also believes this clandestine use of directed energy against human targets or a rabbit explains the Havana Syndrome that could be tit for tat behavior where spy's are using it against each other in what the Department of Defense Non-Lethal Weapons Program terms 'intermediate force capabilities' and a 'grey-zone' where non military means below the threshold of armed conflict are used to achieve a desired objective in a world of irregular warfare.*

*what the FBI calls a 'disruption',*

*Disclaimer: this book contains content that may not be politically correct and in may offend the FBI and Justice Department*

In 2020 there was Directed Energy Summit hosted by defense contractor Booz Allen Hamilton. One of the speakers at the summit had the title "Intermediate Force Capabilities Office" and was a part of the Department of Defense Non-Lethal Weapons Program. In an irregular warfare environment the use of less-than lethal directed energy would be called a 'grey-zone' where non military means below the threshold of armed conflict. Today irregular warfare has become more common place with increased domestic terrorism rhetoric. There was speculation directed energy attacks were behind the Havana Syndrome that the government has given the euphemism anomalous health incidents. Stephen Watson gives his experience of electronic harassment over the span of two decades. He believes the Pentagon is responsible and he was targeted from researching UFOs. He was watch-listed and The Justice Department-FBI is behind the targeting programs using Fusion Centers and Intelligence Contracting. Intelligence contractors hide under the radar using weasel words to advertise their services mitigating against threats. The booming intelligence contracting industry coincides with the rise in people claiming to be targeted individuals where they report directed energy attacks, V2K, gang stalking. Stephen was reported mostly directed energy attacks like Raytheon's 'pan ray.'

*About the author: Stephen Watson majored in Liberal Arts. He has self-published books on Human Primate Press. His hobbies include open-source research and making electronic music. He was raised in the Dallas-Fort Worth metroplex, lived in New York City, and currently resides in Los Angeles, California.*

*This book marks as the 20 Year Anniversary of being a targeted individual. Stephen Watson's of being electronic harassed by contractors and goons.*

*From "FBI Surveillance Van" showing up on Wi-Fi networks to millimeter wave directed energy weapons that inflict pain and are used for no-touch torture, felt driving around Los Angeles, to the government trying to sweep the "Havana Syndrome" under the rug re-naming it "anomalous health incidents," to black bags and itching powder, poison Ivey, to terrorist watch-listing and employment discrimination by job screeners, to working at a government "stinkhouse." Stephen Watson exposes America's tyrannical "counterterrorism" nightmare in what the FBI terms a "disruption" but is really despotism where basic human rights and the US Constitution have gone out the window.*

*This is a raw and unscented book about my childhood and what I could remember from my earliest memories dating back to the late 1970s, to my playful youth during the 1980s, and the puberty years from the late 1980s to early 1990s when I turned an adult. I was a product of the postmodern era. This book serves as a time capsule on how people lived in the late 20th Century with many cultural references and its not revisionist history for fictional entertainment purposes.*

*This is my little sister and I sitting on one of my Dad's saucer creations he was welding. It was in a garage of a house my Dad was renting in Garland, Texas sometime during the mid 1980s. You can read more about my Dad's ideas in the book Gene Watson - Flying Saucers.*
